Hernan Azocar

Business Intelligence Analyst

Brisbane, QLD • Open to relocate anywhere in Australia • 0480-516-452 • hernan.az@hotmail.com • linkedin.com/in/HernanAzocarCristi • HernanAzocarCristi.github.io • Full working rights in Australia

PROFESSIONAL SUMMARY

Business Intelligence Analyst with 2.5+ years of experience building Power BI dashboards, transforming operational data, and delivering KPI reporting to drive business decision-making. Proven ability to collaborate with stakeholders, translate complex datasets into clear insights, and improve reporting efficiency through automation. Adaptable and proactive, with a background spanning data systems and operational management across Chile, New Zealand, and Australia.

KEY SKILLS

Power BI (Dashboards, Data Visualisation, DAX) | **SQL** (Data querying & transformation) | **Power Query** | **Advanced Excel**

Data Analysis & KPI Reporting | Data Validation & Accuracy | Stakeholder Engagement | Requirements Gathering | Dashboard Development | Business Analysis | Microsoft 365

PROFESSIONAL EXPERIENCE

Business Intelligence & Systems Analyst *Oct 2020 – Apr 2023*

Chilexpress — Santiago, Chile (Leading logistics and courier company, 4,000+ employees)

- Designed and delivered 15+ Power BI dashboards used by 30+ stakeholders across 4 business areas — executive board, senior management, operations, and finance — supporting strategic and operational decision-making at the highest levels of the organisation.
- Partnered directly with the executive board and C-level stakeholders to gather reporting requirements and translate business objectives into clear, reliable dashboards.
- Automated data preparation workflows using Power Query and Excel, significantly reducing manual reporting effort and improving data turnaround time across departments.
- Integrated data from multiple operational systems into centralised reporting solutions, improving data accessibility and consistency for cross-functional teams.
- Ensured data accuracy through rigorous validation and consistency checks across multiple data sources, maintaining the reliability of executive-level reporting.
- Translated complex logistics datasets into clear, actionable insights, enabling leadership to identify performance trends and drive operational improvements.
- Provided BI support and training to end users across departments, improving adoption and effective use of dashboards and reporting tools.
- Supported cloud-based system administration and user access management, ensuring smooth operation of business tools.

Portfolio: HernanAzocarCristi.github.io
